PORTION-CONTROL CONTAINERS

The Beachbody Portion-Control Containers will play a huge role in your 80 Day Obsession. You're up for a real challenge over the next 80 days, so let these seven color-coded containers make your nutrition a little easier.

No need for calorie-counting or kitchen scales. You will be using these containers to portion and even transport your meals. Here's how it works. The chart below features your daily portions below colored squares. So if you see a "2" below the Yellow square, that means you'll be filling the  Yellow Container (Carbohydrates) two times a day.

To learn which foods to fill your containers with, see the 80 Day Obsession Container Food lists, which you'll find under Program Materials on Beachbody On Demand.

Here is what each container represents:

 Green Container (Vegetables)

 Blue Container (Healthy Fats)

 Purple Container (Fruits)

 Orange Container (Seeds & Dressings)

 Red Container (Proteins)

 Tsp. (Oils & Nut Butters*)

**Teaspoon not included*

 Yellow Container (Carbohydrates)

THE CHART BELOW TELLS YOU HOW MANY OF EACH CONTAINER YOU CAN EAT DAILY.

YOUR TIMED-NUTRITION MEAL PLAN

When you eat matters as much as what you eat!

80 Day Obsession focuses on **Timed-Nutrition**—eating the right foods at the right times to help promote muscle recovery and growth and boost performance. Timing your nutrition can help ensure your muscles have the protein they need during those building-up phases. It's best to eat your meals every 2–3 hours.

The 4- to 5-hour **Workout Block** also plays an important role in Timed-Nutrition. This targets your nutrient intake to give you the carbohydrates you need to push harder and the protein you need to help recover faster.

NOTE:

- If you find the **Pre-Workout Meal** is too heavy, you can swap it out with **Meal Option 1**. If eating 60–90 minutes prior to your workout is not feasible, eat your Pre-Workout Meal or Meal Option 1 in whatever time you need to digest.
- You can swap around Meal Option 1, 2, 3 in any order.

Here's your Workout Block and your additional timed meals.

(Note: *You don't necessarily need to do the Workout Block first.* Find other options on pages 10–11.)

	TIMING	MEAL	CONTAINERS/SUPPLEMENTS
WORKOUT BLOCK	60–90 min BEFORE Workout	Pre-Workout Meal <i>Your pre-workout meal helps fuel your body so you have enough energy to work at maximum intensity. (Also see Meal (Option 1) as another option.)</i>	Green, Red, Yellow, Spoon

OTHER TIMED MEALS	Every 2–3 hours	Meal (Option 1) <i>If you find the pre-workout meal is too heavy, or you are eating less than an hour before you work out, you can swap it with this option. (Hint: This meal works great with Shakeology!)</i>	Purple, Red, Spoon

How Shakeology® and Beachbody Performance™ fit in to Timed-Nutrition

There's never been a program so specifically timed to help maximize your results. Drinking Shakeology every day isn't just healthy, it also helps make the Timed-Nutrition plan that much easier to follow. Shakeology counts as one ■ Red Container (Proteins) in your plan. And Beachbody Performance supplements (Energize, Hydrate, Recover, and Recharge) are ideal for giving your body what it needs at just the right times to help you achieve those results.*

To learn more, contact your Team Beachbody® Coach or visit Shakeology.com or BeachbodyPerformance.com.

YOUR REST DAY MEAL PLAN

During 80 Day Obsession, Sunday is Rest Day, which is VERY important for success since it allows your body to recover.

NOTE:

- Your container count on these days won't change, but you can switch around your meal options to the order you'd like.
- Keep eating every 2–3 hours to keep your energy levels steady and help with recovery.
- You won't need the Beachbody Performance supplements (Energize, Hydrate, Recover, or Recharge).
- Your ■ Purple Container (Fruits) moves from the post-workout supplement to Meal Option 2 (as shown below).

YOUR MODIFIED REFEED DAY MEAL PLAN

Phase 2 introduces a modified **Refeed Day** every 2 weeks the day before Leg Day. This means you'll eat some additional carbohydrates to help replenish glycogen stores (a form of carbohydrates in your muscles), so you can work out harder and get better results. This is **not** a cheat day! You'll be eating from a Supplemental Yellow Container Food List filled with high-glycemic, fast-absorbing carbs, but the rest of your day still consists of healthy proteins, fruits, vegetables, and fats.

NOTE:

- You can find the Supplemental Yellow Container Food List in the **CONTAINER FOOD LIST** under Program Materials on Beachbody On Demand
- You can use 100% juice (4 fl. oz. =  1)

YOUR *OPTIONAL* PEAK WEEK DEplete DAY MEAL PLAN

If you want to drop a few extra pounds to look extra-shredded by the end of your 80 Day Obsession, you can add four carb-reduced “Deplete Days” to your final Peak Week.

Keep in mind that this is *optional* and Autumn doesn’t recommend it beyond Peak Week. Reducing carbs and increasing protein during these deplete days taps glycogen from your muscles, causing you to look more ripped. It’s a temporary strategy and you’ll probably regain some of the weight lost during Peak Week once you return to your regular nutrition plan. Don’t worry. This is just glycogen and water weight returning to your muscles. It’s perfectly healthy—and you’ll still look great. Make sure to listen to your body and if you lack energy, have nagging headaches, if you feel awful, or experience other discomfort, then switch back to the regular Eating Plan.

- NOTE:**
- You won’t be able to switch out meal option #1 for your pre-workout meal
 - You’ll still eat every 2–3 hours

- You'll skip the Post-Workout Supplement and the Purple Container (Fruits) moves to the Post-Workout Meal (as shown below).
- Bump up the timing for the Post-Workout Meal to within 1 hour of finishing your workout.

	TIMING	MEAL	CONTAINERS
WORKOUT BLOCK	60 to 90 minutes before working out	Pre-Workout Meal	
	WORKOUT		
	Within one hour after workout	Post-Workout Meal	
OTHER TIMED MEALS	Every 2-3 hours	Meal (Option 1)
